SUMMARY

Computer Engineering student and software developer with hands-on experience building web, mobile, embedded, and systems software. Strong focus on Rust, networking, systems programming, and modern web development. Experienced in solving technical problems, working with clients, and teaching programming concepts.

EDUCATION

Tyler Junior College

Associate of Science, Computer Engineering, Currently Enrolled

Tyler, TX

Expected 2028

Moanalua High School

High School Diploma

Honolulu, HI

EXPERIENCE

AI GoLearning Teacher

AI GoLearning

Aug 2024 – Aug 2025

- Taught programming and artificial intelligence concepts to middle and high school students.
- Created interactive lessons to make programming accessible to beginners.

Founder

DNJ Repair

May 2021 – Jan 2025

- Founded and operated an IT repair business, managing clients and daily operations.
- Diagnosed and resolved computer, networking, and system issues.
- Created advertisements and managed the company's Facebook presence to attract new clients.
- Communicated with potential customers and handled client relationships.

PROJECTS

noos

- Built an x86_64 operating system kernel in Rust with interrupt handling, memory management, async task execution, and multicore support.

rsvault

- Developed an AES-256-GCM encrypted credential vault with Argon2 password hashing and C FFI bindings.

portfolio

- Built a personal portfolio using Next.js, React, and Tailwind CSS with GitHub API integration and a Markdown-powered blog.

TECHNICAL SKILLS

Languages: Rust, TypeScript, Python, Java, Lua, C++

Frameworks & Libraries: Next.js, React, React Native, Expo, Tokio

Domains: Systems Programming, Operating Systems, Cryptography, Networking, IoT

Tools: Git, GitHub, Linux, Google Workspace
